

I travel by car over a 3 state area. Most of the time I used to just listen to static or junk. Since I have had XM I can get clear radio wherever I go. I can listen to the things I want. I enjoy the traffic/weather channel because I can see what I am driving into on my way back into my home town. This is the first time radio has been worth anything. Do not allow anyone to eliminate any of my xm programming. Do not accept 04-160Gil Reynolds
